

Custom Report Writer for Magento 2 User Guide

Content:

- Installation
- Configuration
- View (back end orders and front end)

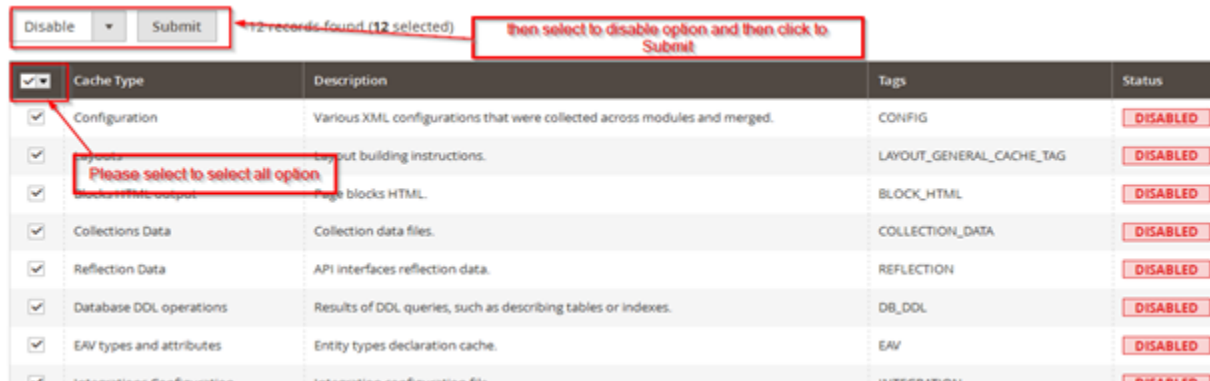

1. Installation:

a) Login to Admin Panel.

b) Go to System > Cache Management

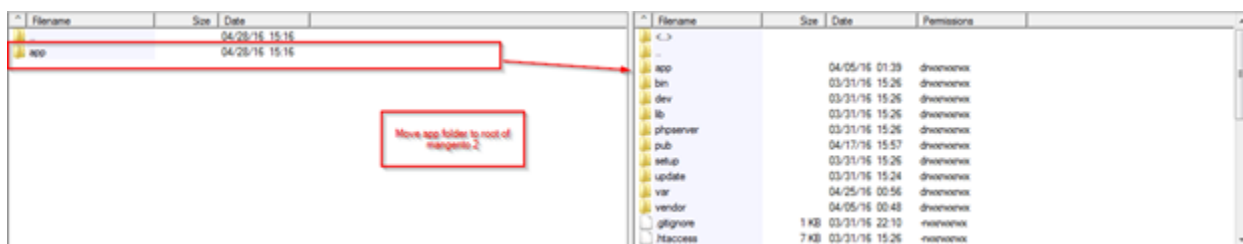

c) Check all options and then select the action to disable and submit.

d) Extract the archive Extension **Web2Market_CustomReport.zip**.

e) Move the app folder in Magento2 root directory.

f) After successfully uploading the folder, run the command on Magento2 root directory-**"php bin/magento setup: upgrade"**

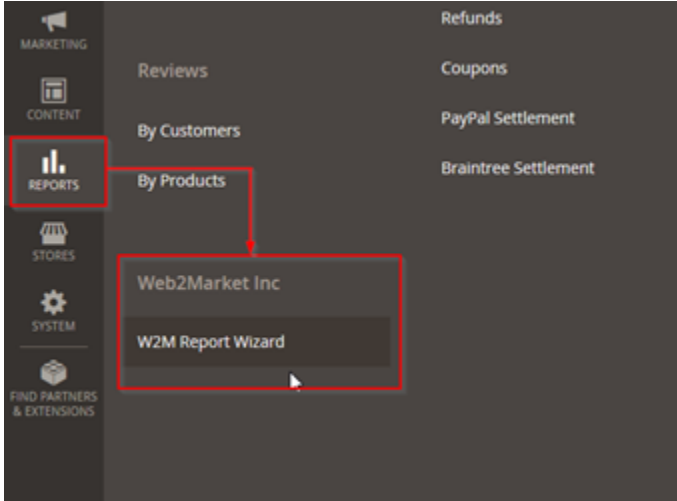

```
-bash-4.1$ php bin/magento setup: upgrade
```

Also, run this command in the Magento2 Root: "php bin/magento setup: static-content:deploy".

```
-bash-4.1$ php bin/magento setup: static-content:deploy
```

2. Configuration:

Step 1: After the extension is installed, you can find its settings in Reports > Web2Market Inc > W2M Report Wizard in store admin.

Step 2: Click on W2M Report Wizard. You will see the following:

Web2Market CustomReport

For the table and field names in the database, select a table name in the Database Reference section.

Enter your SQL select query in the SQL Query Text box below or select an existing report.

After you have entered code or loaded a report, click "Show Report" to display a grid of results.

If you are creating a new report, change the Select Existing Report dropdown so nothing is selected and select save report drop down button "yes" and enter the report information in the boxes under "Show Report".

We have provided an export option for the report data in CSV format.

When you click the export button, you can save as a csv.

Step 4: If you want to save or update the report, select yes and update your SQL syntax. Then click to show report.

Do you want to save or update report

SQL CODE BOX AND ACTION FOR EXISTING OR ORDERS

Sql query box

```
select * from core_config_data
```

Step 5: You can easily create new report and delete existing report.
